

Segra Unify

Unify is a suite of fully integrated multimedia messaging services for any size business. This single application provides a unified communications experience across tablets, mobile phones, PCs and laptops including Windows, Mac, iOS and Android.

Unify brings together all real-time communications services enabling you to access telephony features, send and receive IMs, and collaborate with Voice, Video and Desktop Sharing.

HD AUDIO & VIDEO CALLING

- Reduce time spent in meetings
- Reach/bring in remote workers by improving understanding through visual cues
- See the faces and hear the voices in your meeting in HD

INSTANT MESSAGING

- Communicate on any of your devices in real-time – no emails or waiting
- Archive conversations for easy access to saved chats later
- Connect employees at different locations or off-site

MY ROOM

- No bridge numbers/codes to remember
- No additional usernames or passwords
- Re-engage, pay attention, “manage” multitaskers
- Calendar, email, chat, voice and video conferencing integration
- Engage guest through invitations using WebRTC

PRESENCE

- See your contacts status in your personal directory
- Get immediate notice of when someone is available or unavailable
- Change your presence to notify the team of when you’re available, away, busy or offline

DESKTOP AND FILE SHARING

- See and share presentations, spreadsheets and other media in real time without email
- As easy as “drag and drop”
- Ensure that everyone is working off the same materials lowering the chance for errors

UNIFIED MESSAGING

- Reduce time spent managing voicemails- no calling, listening, and trying to get phone numbers and take notes
- Instant, one touch call back from your smartphone by using the caller’s phone number in the subject line of the message
