

SIP Flex

Take advantage of Segra's versatile and cost-effective SIP trunking solution that delivers the benefits of Voice over IP (VoIP) – with your existing phone system.

Our SIP solution is flexible and scalable to grow with your business. Segra's SIP solution functions on cable, DSL, Internet access and wireless transports.

Maintain your existing phone numbers, and add additional numbers as needed. Maintain all the features of your PBX/IP BX phone system and gain the benefits of VoIP.

BENEFITS

- Cost Savings - Dramatic savings on local and long-distance calls.
- Expand Effortlessly - You select the number of lines/trunks and add as you grow. It's easy and expansion is unlimited.
- Transition Seamlessly - We do it your way. We work with your existing Internet provider, whether it's cable, DSL, Internet access or wireless transport.
- Stay Connected Always - No matter where your offices are located, your business is fully operational – virtually.
- Increase Profits - Leverage your Internet connection and investment by simultaneously sharing voice and data on one transport.

FLEXIBLE FEATURES

- US Area Code Direct Inward Dialing (DID) availability.
- Caller ID (name and number).
- Caller Record Detail (long-distance only).
- Shared Long-Distance minutes per line.
- E911 support.

LOCAL SUPPORT

Our Customer Solution Center (CSC) provides immediate customer assistance and resolution. Proactive network monitoring and management is provided by our Customer Network Operations Center 24/7/365.

TRUSTED PROVIDER

Segra is a long term provider for many state and local services agencies throughout our entire footprint.
