

Extensive Fiber Optic Network

The Segra super-regional fiber network stretches from Pittsburgh, PA to Atlanta, GA, accounting for over 21,000 fiber route miles and over 1 million fiber strand miles. Vast majority of the network is concentrated in the high-growth markets of Virginia, North Carolina and South Carolina. Segra builds, operates, manages and sells a full suite of carrier services, enterprise and governments business services, across the expansive mid-Atlantic network.

WE INVEST IN TOMORROW. SO YOU CAN SUCCEED TODAY.

Segra fiber empowers your business with a fast, reliable, secure, scalable, powerful and future-proof network. We understand the demanding needs for unified communications in today's business and with Segra Fiber you will have an elite suite of products and services at your fingertips that will prepare your company for the future success it desires. Segra Fiber is the sole difference maker in what can be offered in your company's Voice, Data and Internet solution.
