

Hosted Voice

Whether your business needs to be able to handle more voice traffic or have more robust calling features, Segra Hosted Voice has you covered. We understand that the difference you make for your customers and the leverage you have over the competition may just be a call away. With the needs of business in mind, our Hosted Voice's scalable, efficient, cost-effective solutions use the latest technology and have the flexibility to expand as technology changes and your business grows.

With IP Voice, the possibilities are endless with advantages that far out weigh conventional phone systems. The demands on businesses today require fast, flexible, cost-effective and easy-to-use communication solutions. Because the difference you make for your customers and the leverage you have over the competition may just be a call away.

INCREASED PERFORMANCE

Ultra-fast fiber speeds take Hosted Voice above and beyond so you can take your business communications to a whole new level. Monthly meetings, sales presentations and training classes can still be face-to-face with virtual meetings that are one simple call away.

COMMUNICATE FROM ANYWHERE

With Hosted Voice, voice and data travel over the Internet, just as email does, so you can stay in contact with your employees, clients and vendors however, wherever. Conference call, video conference, email, fax – Take the office with you. Conduct 'business as usual' at the airport, on the road, client site... anywhere.

IT'S SIMPLE, YET POWERFUL

Access voice and data from one single network – anywhere high-speed Internet is available.

SECURE & RELIABLE

The Segra private network assures that you stay connected and protected– always. It's secure access to remote workers and branch offices without worry. Our network is locally managed and monitored 24/7/365.
